## PROFILE SUMMARY

I have a proven ability to identify patterns and ideas in cyberspace, and to implement technology and security strategies that ensure the confidentiality, integrity, and availability of systems. My experience spans cybersecurity infrastructure, Workato automation, full-stack development, and API management—enabling me to build secure, scalable solutions that meet evolving business needs. With strong communication skills and a collaborative mindset, I thrive in dynamic environments. My passion for technology and protecting data is deeply rooted, having grown up in a digital world.

## WORK EXPERIENCE

### CAPACITI

OCTOBER 2024 - APRIL 2025

#### Automation specialist intern

- Workato automation
- Front end
- Backend
- API Management

### OUTSURANCE

NOVEMBER 2023 - OCTOBER 2024

#### Cyber Security Intern

- Responsible for the deep analysis of inbound emails for malware and phishing using tools like windows sandbox, virustotal, browserling and mxtoolbox.
- Monitor and create daily reports based on all the security tools like the EDR, SIEM, Email Security and the SOC team alerts for all detections.
- Make exclusions for websites and users - Content filtering
- Send monthly reports to managers to encourage their team members to complete the security awareness training.
- Blocking malicious email addresses on the email security gateway
- Vulnerability assessment.
- Powershell to get hash values of documents for analysis
- Conduct phishing simulation.
